UDO
ELECTRIC

AUTO NAHI AUTOPLANE BOLO

In the last 70 years, India has transformed a lot. But Indian autos are still the same. It provides same power, same comfort and same design. But the good news is that this won't be same anymore. We now have the country's first Autoplane - **The UDO Electric.**

It gives an aeroplane experience with more power, better comfort and unmatched aerodynamic design. Powered by modern technology and smart controls, every drive becomes a flight that provides safety and more earnings for the driver.

Not just performance, it's an
Autoplane Performance.

Real World Range*

200 km

55

Three Drive Modes of UDO

Range Mode

For long drives

Ride Mode

For city areas

Race Mode

For more speed
(55 km/h top speed)

*UDO's certified range is 265 km. Real world range varies with usage conditions. Terms and conditions apply.

10 kW peak power and **52 Nm** torque that gives riding confidence on every road

25% Max Gradeability for easy uphill drive

11.7 kWh laser welded battery that's the most efficient in its category

Hill Hold Feature that makes riding comfortable on every slope

Segment's first **Reverse Throttle** for easy one-handed vehicle control

With every brake and **Reverse Throttle** use, the auto **regenerates** energy for a longer range
